The Soldier’s Monument & War Memorial

In June 1910, the town voted to erect a Soldier's Monument in Academy Park. Made of granite, the base is 16 feet square, 24 feet high and surmounted by a twelve-foot bronze statue of a soldier bearing a flag. Inscribed on the bronze tablets are the names of the 176 Morrisville Civil War veterans. The Soldier’s Monument arrived in December of 1910. Under the monument was placed an account of events leading up to the securing of the monument and other important records. The monument was dedicated on Memorial Day in 1911.

In July of 2017, the soldier was temporarily removed for repairs. When reinstalled, a time capsule was buried on the north side, to be opened in 30 years.

The Civil War Cannon

This three-inch ordnance rifle was erected in 1863 during the Civil War. For many years, the cannon stood on steel pill box supports. Members of the VFW Post 903 of Morrisville raised funds from the Alexander H. Cuppy Trust Fund and the community and in 2015, built and installed the cannon on a historically-accurate replica carriage.
